0. Other:						

U.S. Patent and Trademark Office PTOL-303 (Rev. 11-03) Continuation of 2. NOTE: Although the proposed amendment only incorporates the limitations of claims 18 and 19 into claim 17, it is the position of the Examiner that the proposed amendment would require the Examiner to conduct another search for the limitations of claims 6 - 7. It should be noted that claims 18 and 19 are rejected by a different rejection than claims 6 - 7.

Continuation of 5. does NOT place the application in condition for allowance because: it does not overcome the previously set forth rejections. Tucci discloses that the composition can be used in wall and floor coverings (column 10, lines 55 - 60). Even though Tucci does not directly disclose the actual wall covering substrate, Tucci does suggest the use of the composition in a wall covering and that the composition can be applied to an array of fabric substrates including textile blends, woven, non-woven, knits, etc (column 10, lines 4 - 55). In response to Applicant's argument that there is no motivation to modify the insect-repellant fabrics of Tucci by applying a pressure-sensitive adhesive of Fagan, the Examiner respectfully argues the contrary. Tucci teaches that the composition can be used for wall and floor coverings. In order to make a wall covering that can be easily adhered and removed, it would have been obvious to incorporate the pressure sensitive adhesive coating of Fagan in the wallcovering of Tucci. The rejections are maintained.
